Alum Cave Bluffs Trail

Distance: 5.0 miles from Newfound Gap Road to the lodge. *Elevation gain:* 2,600 ft. *Landmarks:* Arch Rock, Inspiration Point, Alum Cave Bluffs. *Highlights:* Grand views south and west over the Smokies; impressive stands of Rhododendron, Myrtle, and Mountain Laurel in late spring; over a mile of creekside hiking.

Trailhead located 9.0 miles north of Sugarlands Visitor Center and 4.0 miles south of Newfound Gap. Restrooms and trash receptacles available at parking area. Trail is the shortest and most popular route to and from the summit. The climb can be moderately strenuous, and skirts several cliff edges and open slopes along the upper portion, each equipped with cables for handholds. Ice and snow can pose hazards during the colder months, in which traction devices are highly recommended.

The Boulevard Trail

Distance: 8.1 miles from Newfound Gap to the lodge. *Elevation gain:* 1,600 ft. *Landmarks:* Newfound Gap, access to The Jumpoff, access to Myrtle Point, High Point. *Highlights:* Views into TN/NC; ridgetops blanketed with wildflowers in spring, cooler temperatures from start to finish during summer months

Trailhead located at Newfound Gap, where the Appalachian Trail (AT) and US 441 converge. Restrooms and trash receptacles available at parking area. Head northbound along the AT from base of dedication monument. The actual Boulevard Trail begins after 2.7 miles, where hikers take a left at the junction and travel another 5.4 miles to the lodge. Trail rolls along a ridgeline with numerous ups and downs, accounting for nearly 2,700' of climbing and 1,300' of descent en route to the lodge. Due to its consistently high elevation, the trail is subject to harsh weather and deep snows in colder months.

Bull Head Trail

Distance: 6.9 miles from Cherokee Orchard to the lodge. *Elevation gain:* 4,000 ft. *Landmarks*: The Pulpit *Highlights*: Views over the West Prong and TN Valley, spring and summer wildflowers, exposed rock formations.

Trailhead accessible from Cherokee Orchard by hiking the Old Sugarlands Road 0.4 miles west from the Rainbow Falls trailhead. Restrooms and trash receptacles available at parking area. Climb spans numerous forest types in its ascent to the lodge, beginning in lush cove hardwoods, passing through arid pine stands, then concluding in cool spruce-fir. Several miles of trail are now canopy-less due to the 2016 fires, exposing hikers to the full heat of the sun during the summer months.

Rainbow Falls Trail

Distance: 6.7 miles from Cherokee Orchard to the lodge. *Elevation gain:* 3,900 ft. *Landmarks*: Rainbow Falls, Rocky Spur *Highlights*: Creek crossings and small pools, exposed rock formations, wildflowers in spring, vibrant colors in autumn, seasonal views of TN Valley.

Trailhead accessible from Cherokee Orchard. Restrooms and trash receptacles available at parking area. Hike is a relentless climb from base to summit, mostly forested and often wet from water runoff. Due to its popularity, the hike to Rainbow Falls is often congested. After 3.0 miles, the trail navigates an unbridged crossing of LeConte Creek that can be hazardous in times of high water. Trail intersects with Bull Head 0.5 miles below the lodge, forming a convenient loop hike back to Cherokee Orchard.

Trillium Gap Trail

Distance: 6.7 miles *Elevation gain:* 3,300 ft. *Landmarks*: Grotto Falls, access to Brushy Mountain *Highlights*: pack llamas three days a week, small creek crossings, spring wildflowers, can double as a horse trail (day-use only).

Multiple trailheads, the shortest and most popular route accessible from the one-way Roaring Fork Motor Nature Trail. Trail is 8.9 miles long when starting from Cherokee Orchard. Restrooms and trash receptacles available at both trailheads. Incredibly popular hike to Grotto Falls is often congested. Forested climb is most gradual of all approach trails to the lodge. Great alternative for those wanting to avoid the steepness, exposed cliffs, and crowds of Alum Cave.
